Probability Experiment

Describe Your Experiment: _____

_____

_____

Independent Event #1: _____

Independent Event #2: _____

Favorable Outcome: _____

Theoretical Probability:

Organize Outcomes

1. Create a Table of all the possible outcomes.

2. Create a Tree Diagram of all the possible outcomes.

3. What is the Sample Space for your experiment?

Probability Experiment

Experimental Probability Results		
Outcome	**Tally**	**Total**

Favorable Outcome (same as above): _____

Experimental Probability:

Conclusion: _____

_____
